

Kossi Edem Emile D. Aholou

Electrical Engineer | Power Distribution (MV/LV) and Solar Projects

Edmonton, Alberta, Canada • aholou.emile09@gmail.com • linkedin.com/in/kossi-edem-emile-d-aholou • oltavia.com
Permanent resident of Canada • Bilingual English and French • Valid driver's licence • Open to relocation

PROFESSIONAL SUMMARY

Electrical engineer with a degree assessed by WES as equal to a bachelor's and master's, and 5+ years in power distribution, solar energy and construction projects. Led medium and low-voltage transmission and distribution projects from design review to site delivery, with teams of 20 to 30 people. Cut completion times by at least 15% and raised team productivity by 20%. Comfortable with AutoCAD Electrical, CANECO and MATLAB, and with keeping contractors, consultants and clients aligned on quality and safety.

CORE COMPETENCIES

Power systems: MV/LV distribution, solar PV projects, drawing and specification review, cost estimates

Software: AutoCAD Electrical, CANECO, MATLAB, LabVIEW, Primavera P6, MS Project, MS Office

Project delivery: Scheduling, budgets, risk management, contractor coordination, quality and compliance

Safety: WHMIS 2015, Construction Safety Training System (CSTS)

ENGINEERING EXPERIENCE

Construction Project Manager | Desco Architectural Firm

January 2023 – April 2024

Lomé, Togo

- Prepared cost estimates and followed budgets on multi-phase projects, reducing budget overruns by 15%
- Managed contracts, checked compliance and coordinated contractors and consultants to meet quality standards

Engineering Manager, Energy Transport & Distribution | CH2000

January 2021 – December 2022

Conglomerate Horizon 2000 • Lomé, Togo

- Led medium and low-voltage power transmission and distribution projects across several sites
- Reviewed engineering designs and approved them or asked for changes to improve compliance and reduce risk
- Hired, trained and directed teams of 20 to 30 people and raised productivity by 20%
- Cut project completion times by at least 15% by streamlining scheduling and status reporting
- Won a follow-up contract with the same client after delivering the first project

Project Coordinator, Solar Energy | ARESS Togo, solar subsidiary of CH2000

January 2019 – December 2020

Lomé, Togo

- Prepared cost estimates for upcoming solar projects to support budgeting and resource planning
- Advised senior management on technical questions and engineering decisions
- Checked project data for accuracy and set up risk management steps for technical work to improve safety

OTHER EXPERIENCE

Founder | Xodyia

September 2026 – Present

Edmonton, Alberta

- Started an AI and automation company for small businesses

Development Agent | Réseau Santé Alberta

October 2024 – Present

Edmonton, Alberta

- Coordinate program schedules, stakeholder communication and progress reporting across central Alberta

EDUCATION & PROFESSIONAL DEVELOPMENT

Engineering Diploma, Electrical Engineering

2018

Institut de Formation Technique Supérieure (IFTS), Togo • WES: equivalent to a Canadian bachelor's and master's degree; power and low-current systems

36-Hour PMP Exam Preparation Course

Completed

Coursework aligned with PMI standards • Working toward the PMP designation
